

AUI Contractors - Leadership in Sustainability

AUI Contractors was recently named a **Certified Green Contractor** by Associated Builders and Contractors (ABC). ABC's Green Contractor Certification program recognizes construction companies that implement sustainable practices, principles and education in the workplace, including headquarters, branch offices and jobsite office complexes.

AUI Contractors is one of fifteen firms in the nation and the **FIRST contractor in Texas** to receive this certification.

Our efforts to develop a sustainable workplace environment, both on and off the jobsite, will have a positive impact on the environment by reducing pollution, waste and green house gas emissions and saving energy, water and raw materials.

Sustainability Statement

We will pursue our corporate Vision in a culture dedicated to sustainability, making decisions and setting direction with a focus on the long-term environmental, economic, and social impact of our business.
